THEFT TRUCK TREND IN ITALY

In Italy the theft of the truck is a growing problem in the expansion. A real business that in 2014 he continued the gradual growth: almost 7 trucks are stolen every day.

SECURITY: A NEW CONCEPT

Two main pillars which became more and more relevant in the last years for logistic and transport company.

They are at the forefront of everyone's mind when they travel.

In order to comply those needs, the necessity to implement solutions that do not include only the presence of a single security tool, it is becoming more and more relevant.

A methodological global approach allows the definition and the enforcement of the security process to obtain the TAPA certification.

Security for restricted area

Security in a heterogeneous system

European Security system

WHAT'S NEXT?

Autoparco Brescia Est already took up the actual challenge in the world of transport, providing the security both for the drivers, the truck and cargo trailer.

This become a reality investing mainly in technology and programs in order to render trackeable every vehicle and person once they join the structure.

MISSION: align the actual security standards to the rest of the European circuit, becoming the leader in Italy.
